

ATNI'S 2022 U.S. Index

Social Media Partner Toolkit

October 2022

Introduction

The Access to Nutrition Initiative (ATNI) is excited to release its [2022 U.S. Index](#), which assesses the 11 leading food and beverage manufacturers in the U.S. on the healthiness of their product portfolios and their nutrition-related commitments, policies and disclosures. While all companies have placed a greater focus on nutrition in their corporate strategies since the first index was released in 2018, **their actual products have not become healthier, and they are not making sufficient efforts to safeguard children from the marketing of unhealthy products.**

The food and beverage industry has an important role in addressing key nutrition challenges. Now is the time for companies to take action, and **the index is a tool that you can use to help hold the food and beverage industry accountable for delivering on their commitments.**

Would you mind doing one or more of the following things to help us spread the word?

- Post the messages and graphics below to your social media accounts. Use the #ATNIUSIndex and #USIndex2022 hashtags on Twitter and LinkedIn.
- Like the Access to Nutrition Initiative page on [Twitter](#) and [LinkedIn](#).
- Follow [ATNI](#), [Greg S. Garrett](#) and [Jamie Bussel](#) on Twitter. They'll be sharing the Index too.

Social Media Content

Subject line: Released Today: Access to Nutrition Initiative's 2022 U.S. Index

Hi [NAME],

We are excited to share the [2022 U.S. Index from the Access to Nutrition Initiative \(ATNI\)](#), which is an important tool to help inform our work to address key nutrition challenges, reduce diet-related diseases and prevent hunger and food insecurity. This is a follow-up to ATNI's first U.S. Index, which was released in 2018.

The Index—which assesses the 11 leading food and beverage manufacturers in the U.S. on the healthiness of their product portfolios and their nutrition-related commitments, policies and disclosures—found that **companies are not making adequate progress on their commitments to make and market healthy foods**. While all companies have placed a greater focus on nutrition in their corporate strategies since the first index was released in 2018, their actual products have not become healthier, and they are not making sufficient efforts to safeguard children from the marketing of unhealthy products.

Read the 2022 U.S. Index to learn about the methodology and review a full list of [findings and recommendations](#) for industry to play a more prominent role in improving health and reducing diet-related diseases. ATNI is hosting a launch event on October 20 at 10:00 am EST, which will bring together a diverse set of stakeholders to discuss the food and beverage sector's role in improving nutrition in the U.S. You can [register here](#).

We would greatly appreciate you [using this social toolkit](#) to share posts on social media and other digital channels or simply resharing one of ATNI's posts on [Twitter](#) or [LinkedIn](#).

Best,
[SENDER]
